LIRON MEIROVITCH

Global IT Manager | Microsoft 365 | IT Operations | Workplace Technology | Automation | Service Delivery

Hod Hasharon, Israel | Phone: +972 54 744 3398 | Email | LinkedIn | Portfolio Website

PROFESSIONAL SUMMARY

Forward-thinking Global IT Manager with 10+ years of fast-paced expertise architecting enterprise IT operations, scaling Microsoft 365 ecosystems, driving zero-trust identity architectures, and fortifying global workplace technical standards. Champion at optimizing infrastructure availability for international workforces, engineering advanced workflow automations, and converting business requirements into robust, high-performance service delivery architectures.

CORE EXPERTISE

- **Enterprise IT Infrastructure:** Microsoft 365, Entra ID (Azure AD), Intune MDM, Exchange Online, Teams, SharePoint, Endpoint Management, Systems Administration
- **Security & Governance:** Identity & Access Management (IAM), Security Operations, Compliance Frameworks, Standards & Regulations, Incident Response, ITIL Frameworks
- **Technical Development & Automation:** Python Development, Workflow Automation, SQL (SQLite, SQLAlchemy), Streamlit Dashboards, Git/GitHub Version Control, DevSecOps Foundations

PROFESSIONAL EXPERIENCE

TOMIA / Flash Networks | *Global IT Manager* — 2024 – Present

- Orchestrate global IT operations for a distributed, multi-regional workforce of 300+ employees, successfully driving high system availability and zero-downtime operations.
- Govern the core Microsoft 365 cloud environment and modern configuration baselines for Entra ID, Intune endpoint compliance, Exchange, Teams, and corporate SharePoint architecture.
- Streamline lifecycle identity state by architecting custom automated onboarding and offboarding workflows, reducing manual technical overhead by over 40%.
- Spearheaded development of Job Copilot Enterprise — a full-scale, portfolio-grade technical job intelligence application built from scratch utilizing Python, SQLAlchemy, SQLite, and Streamlit.

Cyolo Security | *Global IT Manager* — 2023 – 2024

- Directed global service delivery, cross-border workplace support strategies and infrastructure reliability criteria across international operational hubs.
- Championed enterprise identity governance and security perimeter baselines, enforcing rigid conditional access controls and mitigating potential corporate surface vulnerabilities.
- Elevated operational efficiency across legacy systems via deep API tool integration, modern scripting, and tailored automation engines.

Ram Aderet | *IT & Information Systems Specialist* **2022 – 2023**

- Administered and maintained critical network topologies, corporate firewalls, hardware deployment procedures, and hybrid workplace technology assets.

Verint / Cognyte | *IT Tier 2 Systems Engineer* **2018 – 2022**

- Delivered advanced technical support for enterprise ecosystems including Microsoft 365, Azure Active Directory, Intune, and Citrix farm deployments.
- Coordinated and executed a massive enterprise-wide cloud tenant and resource migration, successfully transforming operational scaling for 1,000+ global users and endpoints.

TECHNICAL SANDBOX PROJECTS

Job Copilot Enterprise | *Creator & Developer*

- **Architecture & Stack:** Built a sophisticated job intelligence platform featuring full recruiter CRM systems, comprehensive application analytics tracking, dashboard visuals, and automated grading/scoring frameworks.
- **Core Technologies:** Python, SQLite, SQLAlchemy, Streamlit, Git, GitHub CI/CD methodologies.

PROFESSIONAL CERTIFICATIONS

- **Microsoft:** Azure Fundamentals (AZ-900)
- **Amazon Web Services:** AWS Cloud Fundamentals
- **IBM Professional Training:** Cybersecurity Assessment (CompTIA Security+ & CySA+ Preparation), Governance, Compliance Frameworks, Standards & Regulations, Incident Response, Digital Forensics, and Threat Hunting
- **Johns Hopkins University:** Cybersecurity Certificate & Introduction to DevSecOps
- **New York University:** Introduction to Cyber Security Specialization
- **Google:** IT Support Professional Certificate (Network Security, Bits and Bytes of Computer Networking, System Administration & IT Infrastructure Services)
- **LearnQue / ITIL:** ITIL 4 Foundation Operational Framework Preparation
- **Illinois Tech / IBM:** Operating Systems, Architecture, Administration & Hardware

LANGUAGES

Hebrew: Native Mastery | **English:** Professional & Technical Fluency
